HUMAN CAPITAL SOLUTIONS

## CERTIFICATE

This is to certify that **M MANI KANTA** has completed his **INTERNSHIP AT SPR**

**For the period of 30 days i.e. from 11-06-2015 to 11-07-2015**

With course on **SINGLE PHASE ENERGY METER** and receiving certificate of **LIVE INDUSTRIAL EXPERIENCE**

### HAS BEEN TRAINED

- Models of single phase energy meter
- PCB components and specification
- Power consumption and demands
- Live industry visit, testing and visible inspection
- Discuss about internship with experts job roles and responsibilities

### BENEFITS\*

Interviews for placements after the graduation.

**Congrats for completing the training success fully and being a part of SPR by attending the internship programme MAY 2015.**

**DEPARTMENT OF CIVIL ENGINEERING**

**Industrial visit Report on Nizam sagar dam**

We have visited the Nizam sagar dam on 23/9/2015

Nizam Sagar Dam is an Indian dam named after the Nizam of Hyderabad. It is a reservoir constructed across the Manjira River, a tributary of the Godavari River, between Achampet and BanjePally villages of the Kamareddy district in Telangana, India. It is located at about 144 km north-west of Hyderabad. Nizam Sagar is the oldest dam in the state of Telangana.

**History**

Nizam sagar dam was constructed in 1923 by Mir Osman Ali Khan - the 7th Nizam of the erstwhile Hyderabad State. It was made by emptying over 40 villages.

This masonry dam sprawling across the river for 3 km with a fourteen feet wide motorable road over it. There are excellent boarding and lodging facilities nearby, for tourists.

Before Nizam Sagar was built, the Manjira River was not properly harnessed and little water was being used by diverting water at Ghanpur Anicut for irrigating about 5,000 acres and an open Channel called Mahaboob Nagar (Right Canal) in Medak District. The Ghanpur Anicut was the first scheme constructed across Manjira river in 1904 at a cost of Rs.18.00 Lakhs. Some years later, Nawab Ali Nawaj Jung Bahadur as Superintending Engineer added Fatch Nahar ( Left canal ) to increase the utility of the river later. The ayacut of 17,308 acres was being irrigated under this Ghanpur Anicut which subsequently increased to 30,000 acres as per actuals.

Nizam sagar Project is the second irrigation scheme on Manjira river and the largest in the then Hyderabad state taken up during the year 1923 and completed by the year 1931. This Project was originally contemplated for utilization of 58.00 TMC of water to irrigate 2, 75,000 acres in Banswada, Bodhan, Nizamabad and Armoor Taluks of Nizamabad District. After reorganization of States in 1956, the Manjira basin got distributed among the three states viz., Maharashtra, Karnataka and Telangana.

Different irrigation schemes have come up in above three states. Some of them to mention are:

Manjira Barrage and Singur Project in Telangana to meet the drinking water needs of twin cities of Hyderabad and Secunderabad in Telangana.

Karanja Project, Choukina Project in Karnataka, Lower Tiruna Project, Manjira Project in Maharashtra State. Therefore, the inflows into Nizam sagar Project and as well as the low flows at Ghanpur Anicut during lean periods have dwindled considerably. Added to this the silting of reservoir has been at greater pace than designed for. From the investigation conducted by the A.,P.E.R.L. (Andhra Pradesh Engineering and Research Laboratories) Hyderabad in 1973, it was shown that the capacity of 29.7 TMC at original FRL of RL + 1400.50 ft. has been reduced to 11.8 TMC. In the remodeling proposals F.R.L. has been raised from +1400.50' to +1405.00' and the capacity at this new FRL of + 1405.00' is 17.80 TMC.

Apart from the above changes, out of the total localized ayacut of 2,75,000 acres, 28,085 acres have come under submergence of Sreeramsagar Project, 8,296 acres have come in the command of Lakshmi canal and Kakatiya Canal of Sreeramsagar Project, and 7,260 acres ayacut has not been getting water since inception of Nizamsagar Project. Thus, the settled ayacut of 2,75,000 acres has come down to 2,31,339 acres.

The people here in local believe that everyone should visit this place at least once in whole life to make it complete.

In view of the above enumerated facts, the inflows into Nizamsagar Project not only reduced but also delayed resulting in not only in the delayed commencement of agricultural operations in the ayacut but also some times loss of crop due to insufficient water supply. The problem has become more acute during the years 1972-73, 1993-94 and 1994-95. Babli dam

## DEPARTMENT OF CIVIL ENGINEERING

### Report on Nagarjuna sagar dam

We visited Nagarjuna sagar dam on 17/8/2015.

Nagarjuna Sagar Dam is a masonry dam across the Krishna River at Nagarjuna Sagar which straddles the border between Guntur district, Andhra Pradesh and Nalgonda district, Telangana. Constructed between 1955 and 1967, the dam created a water reservoir with gross storage capacity of 11.472 billion cubic metres (405.1×10<sup>9</sup> cu ft). The dam is 590 feet (180 m) tall from its deepest foundation and 0.99 miles (1.6 km) long with 26 flood gates which are 42 feet (13 m) wide and 45 feet (14 m) tall.

Nagarjuna Sagar Dam was the earliest in a series of large infrastructure projects termed as "modern temples" initiated for achieving the Green Revolution in India. It is also one of the earliest multi-purpose irrigation and hydroelectric projects in India. The dam provides irrigation water to the Nalgonda, Suryapet, Krishna, Khammam, West Godavari, Guntur, and Prakasam districts along with electricity generation. Nagarjuna Sagar Dam is designed and constructed to use all the water impounded in its reservoir of 312 TMC gross storage capacity which is the second biggest water reservoir in India.

### History

The Nizam made the British engineers begin the survey work for this dam across the Krishna River in the year 1903. The project's construction was officially inaugurated by Prime Minister Jawaharlal Nehru on 10 December 1955 and proceeded for the next twelve years. Raja Vasireddy Ramagopala Krishna Maheswara Prasad, popularly known as late Muktyala Raja, was instrumental in the construction of the Nagarjuna Sagar Dam through active political lobbying and the donation of one hundred million British pounds and fifty-five thousand acres of land. It was the tallest masonry dam in the world at that time, built entirely with local know-how under the engineering leadership of Kanuri Lakshmana Rao, the then Member of Parliament from Vijayawada.

The construction of the dam submerged an ancient Buddhist settlement, Nagarjunakonda, which was the capital of the Ikshvaku dynasty in the 1st and 2nd centuries and the successors of the Satavahanas in the Eastern Deccan. Excavations there yielded 30 Buddhist monasteries as well as artwork and inscriptions of historical importance. Prior to the reservoir's flooding, monuments were dug up and relocated. Some were moved to Nagarjunakonda, now an island in the middle of the reservoir. Others were moved to the nearby mainland village of Anupu.

The reservoir water was released into the left and right bank canals by Prime Minister Indira Gandhi on August 4, 1967. Construction of the hydroelectric power plant followed, with power generation increasing between 1978 and 1985 as additional units came into service. In 2015, diamond jubilee celebrations of project's inauguration were held, alluding to the prosperity the dam has ushered into the region.

Data

## Nagarjuna Sagar right Earth Dam

Catchment Area : 214,185 km<sup>2</sup> (82,697 sq mi)

Full Reservoir Level (FRL): 179.83 metres (590 ft) msl

Water spread area at FRL: 285 km<sup>2</sup>

Gross storage capacity at FRL: 312 TMC[7]

MDDL of river sluices: 137.3 metres (450 ft) msl

Masonry dam

Spillway of dam : 471 m

Non-over flow dam : 979 m

Length of Masonry dam : 1450 m

Maximum height : 125 m

Earth dam

Total Length of Earth dam : 3414 m

Maximum height : 128 m

Power Generation

Power Units : 1 No. conventional (110 MW capacity), 7 nos Reversible (100 MW capacity)

Canal power house

Right side : 3 units 30 MW (each)

Left side : 2 units 30 MW (each)[8]

Utilisation

Irrigation

The right canal (Jawahar canal) is 203 km (126 mi) long with maximum 311.5 cumecs capacity and irrigates 1.117 million acres (4,520 km<sup>2</sup>) of land in Guntur and Prakasam districts. The left canal (Lalbahadur Shastri canal) is 179 km (111 mi) long with maximum 311.5 cumecs capacity and irrigates 1.008 million acres (4,080 km<sup>2</sup>) of land in Nalgonda, Suryapet, Krishna, West Godavari and Khamman districts.[8] The project transformed the economy of above districts. 54 villages (48 in Nalgonda and 6 in Guntur) were submersed in water and 24,000 people were affected. The relocation of the people was completed by 2007.

Fishing in Sagar backwaters

Alimineti Madhava Reddy lift irrigation canal draws water from the Nagarjuna Sagar reservoir to irrigate 0.37 million acres (1,500 km<sup>2</sup>) of land in Nalgonda district.[9] This lift scheme with pump house located near Puttamgandi village on the left bank of Krishna river also supplies nearly 20 TMC water for the drinking

water needs of Hyderabad city.[10][11] Nearly 80% of the Nagarjuna Sagar water used in Hyderabad city is available for irrigation use in Nalgonda district in the form of regenerated water/treated sewage water. In addition, the high level flood flow canal drawing water from the left side shore of the reservoir also supplies irrigation water in Nalgonda district.

### Power generation

The hydroelectric plant has a power generation capacity of 815.6 MW with 8 units (1x110 MW+7x100.8 MW). First unit was commissioned on 7 March 1978 and 8th unit on 24 December 1985. The right canal plant has a power generation capacity of 90 megawatts (120,000 hp) with 3 units of 30 megawatts (40,000 hp) each. The left canal plant has a power generation capacity of 60 megawatts (80,000 hp) with 2 units of 30 MW each.[12] The tail pond is under advanced stage of construction to put to use the pumped storage features of 7 x 100.8 MW units.

### Nagarjuna sagar dam power generation

Many times, it happens that power generation from the 150 MW canal based units is not optimised when the Nagarjunasagar reservoir is overflowing on its spillway and very less water is required for irrigation from the canals during the monsoon floods. Power generation from canal based hydro units can be optimised by running these units during the flooding period by releasing the water fully into the canals. The unwanted canal water can be released into the natural stream when it is crossing the major stream. Thus run off power can be generated from the water going down unutilised into the river by the canal based power units also.

The water level in the Nagarjunasagar reservoir shall be maintained above the minimum level required for these units in most of the time by releasing water from the upstream Srisaillam reservoir to optimise the power generation from the canal based units during dry season.

## INDUSTRIAL VISIT REPORT

### Purpose of Industrial Visit:

- 1) To interact the students with actual industry personals.
- 2) To make them aware of the industrial procedures required to enter in any company.
- 3) To experience the working environment in industry and visualize the all the important Departments in the Industry.
- 4) Interaction of students with the peoples of all important departments.
- 5) To prepare the students for the selection of carrier path in different departments of industry.

### Summary of the Visit:

Agarwal Rubber Limited is a Public incorporated on 19 March 1983. It is classified as Non-govt company and is registered at Registrar of Companies, Hyderabad. They are one of the leading manufacturers of Rubber tyres. A wide variety of tyres are available.

Department of Mechanical Engineering has organized an Industrial Visit to Agarwal Rubber Ltd, Hyderabad, for Mechanical Engineering students on 02.01.2016. Total 77 students and 3 faculty members have visited the industry. We have divided the students into 3 batches each batch of 26 students. The visit started at 10:00AM and ended at 3:30PM.

By the end of the day, we have visited Design and Manufacturing units. Students have actively interacted with the professionals over there and have gained a wide knowledge on the processes being carried out in the industries. We express our gratitude for Mr. Madhusudan Raju, General Manager(Design) for providing an opportunity for the students to gain industrial knowledge. Also, we thank all the staff of Agarwal Rubber Ltd who has spent their valuable time with us. Also, HOD (Mechanical Engineering) and faculty of Department of Mechanical Engineering thank Principal and Management for providing us all the required facilities for the visit.

## Summary of the Visit:

'HITECH HYDRAULICS' is among the most reputed companies in INDIA in the line of Hydraulics & Pneumatics. They manufacture all types of standard and custom built Hydraulic & Pneumatic Machines, Presses, Power packs, Cylinders, Systems, Test Rigs and Special purpose Equipment. They also undertake Reconditioning and Import substitution of the same.

They are specialists in Machine tool, Earth moving, Mining and Process plant machinery. They did projects as many as in the scope of hydraulics and pneumatics for NMDC, BHEL, Defense, Cement, Sugar and Steel Plants etc.

Department of Mechanical Engineering has organized an Industrial Visit to Hitech Hydraulics for Mechanical Engineering students on 30.01.2016. Total 77 students and 3 faculty members have visited the industry. We have divided the students into 3 batches each batch of 26 students. The visit started at 10:00AM and ended at 2:30PM.

### Features of Industry visit:

- Working of multipurpose lathe machine, CNC machine, inspection and testing of parts
- Pneumatic and Hydraulic Machines
- Components of fighter aircrafts as a part of Defense projects.

- Safety procedures
- Network with like-minded professionals

By the end of the day, we have visited Manufacturing and Assembly units. Students have actively interacted with the professionals over there and have gained a wide knowledge on the processes being carried out in the industries. We express our gratitude for Mr. A. Srinivas, Chairman and Founder, for providing an opportunity for the students to gain industrial knowledge. Also, we thank all the staff of Hitech Hydraulics who has spent their valuable time with us. Also, HOD (Mechanical Engineering) and faculty of Department of Mechanical Engineering thank Principal and Management for providing us all the required facilities for the visit.

Sub: Approval for industrial visit to BSNL.

Respected Sir,

I, M. Srilekha, Assistant Professor of ECE department. As a part of improving academics we are planning to take all the 4<sup>th</sup>, 6<sup>th</sup> and 8<sup>th</sup> semester students for an industrial visit to "Regional telecom training centre, BSNL on 22/01/2016

So, I request you to kindly allow the students for the visit, and I would also like to request for the transportation facility on the particular day.

Thanking you sir.

Yours faithfully

M. Srilekha,

ECE.

M. Srilekha

### **Report on Industrial visit to BSNL**

The department of Electronics & Communication Engineering (ECE), organized one day Industrial visit on 22-01-2016 to REGIONAL TELECOM TRAINING CENTER, BSNL for industrial exposure of B.Tech 4<sup>th</sup>, 6<sup>th</sup> and 8<sup>th</sup> semester students.

Bharat Sanchar Nigam Limited (abbreviated BSNL) is an Indian state owned telecommunications company headquartered in New Delhi, India. It was incorporated on 15 September 2000 and took over the business of providing of telecom services and network management from the erstwhile Central Government Departments of Telecom Services (DTS) and Telecom Operations (DTO), with effect from 1 October 2000 on a going concern basis. It is the largest provider of fixed telephony, largest broadband services provider with more than 60% Market share, and fourth largest mobile telephony provider in India, BSNL is India's oldest and largest communication service provider (CSP). It had a customer base of 117 million as of January 2014. It has footprints throughout India except for the metropolitan cities of Mumbai and New Delhi, which are managed by Mahanagar Telephone Nigam (MTNL). About "RTTC" (Regional Telecom Training Centre), Hyderabad is one of the prime training centers of BSNL in the western region. The Centre is an ISO 9001:2008 Certified Institute. It was established in 1973 catering to the training needs in telecom sector. Telecommunication has emerged as one of the most rapidly advancing and expanding sector.

Total 111 students of B Tech (ECE) along with two faculty members have joined this industrial visit. The team was accompanied by from Mr. Y Raghava Rao, (Sub Divisional Engineer) who provided various insights regarding the different stages based on Networking. The students had the opportunity of visiting seven main sections of the namely

- > FTTH (Fiber to the Home).
- > MLLN (Managed Lease line Network).
- > Network Lab. > Broadband Lab.
- > OFC Lab (Optical Fiber Communication Lab).
- > C DOT Lab. > Telecom Museum.

Sir/ Madam,

Under the department of CSE we are planning to organize an industrial visit to CMC Mehdipatnam on 28/11/2015 with your support for our students. This visit will help them increase their practical skills and awareness about the current software technology in industry era. Kindly permit us to conduct the visit and provide the necessary Transportation.

Thanking you,

## DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

REPORT ON INDUSTRIAL VISIT TO CMC TRAINING CENTER- HYDERABAD  
On 28<sup>th</sup> November 2015

### Introduction

The department of Computer Science and Engineering, organized one day Industrial visit to CMC Training Center on 28<sup>th</sup> November 2015 for B Tech CSE students. The visit was organized with the prior permission and guidance of Hon. Principal and HOD of CSE, Mr.K.pradeep Assistant professors of CSE department, Ms.M.Sowmya accompanied students for this industrial visit. Total 43 students of third year B Tech (CSE) along with one faculty members have joined this industrial visit.

The details of journey are as follows:-

1. We started traveling from Kommuri Pratap Reddy Institute of Technology at 10.00AM on 28<sup>th</sup> November 2015.
2. We reached CMC, Hyderabad at 11.00 AM.
3. After visiting the company we started back at 2.30 PM.
4. We arrived at 3.30 PM. at KPRIT.

CMC Ltd in Hyderabad is one of the leading businesses in the Computer Training Institutes CMC Ltd in Mehdipatnam, Hyderabad has been offering professional training to students. It specializes and is well-known for training students as well as working professionals in accounting, web designing, programming languages, hardware and networking. It is run and managed by a seasoned professional who leads a team of educators and trainers having relevant domain expertise. At this institution, one can get trained in the subject of their choice by opting from a wide range of courses. These easy-to-follow courses are primarily aimed at students, working professionals as well as IT professionals who want to enhance their knowledge and further their career prospects. Located Above HDFC Bank, Near Rythu Bazar, you can find this institution with relative ease at 3RD Floor, SGM Mall in Mehdipatnam. Undoubtedly it is one of the best computer training institutes in Mehdipatnam, Hyderabad.

### Services Offered at CMC Ltd

CMC Ltd in Mehdipatnam offers short-term courses and certificate courses. Inclusive of comprehensive learning, the long-term programmes feature subjects such as web development, financial accountancy, computer application and programming, information technology, multimedia and web-designing. Some of the short-term courses cover topics like Windows XP, 7, 8, 10, Vista, MS

Office, DTP (Desk Top Publishing), Web Designing, Multimedia, Tally ERP 9, C, C++ , and Visual Basic. Walk into this centre all through the week between 07:00 - 19:00. Pay in Cash.

### **Our Experience of Industrial Visit**

Visit seems to be very informative and gives good learning experience. After completing the industrial visit, we have upgraded our knowledge at a very great level. It was a good learning experience. In each & every lab, students got some or the other new ideas and new thinking which was very necessary. Students have visited the entire Academy. They are using new technologies. All the staff members and students are extremely thankful to honorable principal and officials at Training center who grant the permission for visiting their organization and guide the students.

College authorities proposed to visit DOORDARSHAN KENDRA as part of educational workshop environment. Students reached in time guided by faculty members. We Reached by 11:00 AM Doordarshan yadagiri after security formalities enter the technical zone Ramanthapur studios here the programmes are made live news and other part of activities by duty engineer explained briefly about its functionary systems.

- PCR- PRODUCTION CONTROL RPPM 1&2
- MAR- MASTER SWITCHING ROOM
- STUDIOS- 1&2
- EARTH STATION

Here the programme sent to station by using high power microwaves through PDA PARBOLIC DISH ANTENA positioned towards satellite transponder that coordinates to which the earth station antenna must be pointed to communicate with the satellite is called LOOK ANGLES. They are azimuth and elevation longitude and latitude of the place to demine played vital role in track back satellite.

**Ob van** and **DSNG VAN** these are mainly cover live telecast of various programmes. Up- linking studio and other places too. After finished here we went transmitter at MALAKPET.

### TRANSMITTERS COMPLEX

Here two types of transmitters are working .10kw and 1kw

Here down link the programme through PDA signals are in c-band or ku-band. Satellite system explained space communication satellite is in stable state of the orbit broadcasting service that allows subscriber to receive TV signals through dish. An outer antenna the TV signals comes that in fixed orbit above the EARTH. Communication satellite is an artificial satellite that relays and amplifies radio and telecommunications signals via TRANSPONDER it acts communication channel between SOURCE and RECIVER..

**Geosynchronous orbit**, the orbit happens when satellite's orbit around the earth matches the rotation of the earth thus it becomes a FIXED or stationary position the sky. Satellite is above 35890kms the equator. Observer on earth a satellite in a geostationary orbit appears motion less in a fixed position in sky this is because it revolves around the earth's own angular velocity 360 degrees way 24 hours in equatorial orbit.

Due to bushes in the area nearby PDA our students are feared about unwanted hazards stopped and take away to his chamber, where three satellites is enough to cover global positioning our needs but 2200 satellites are in different orbits in space. Space is for peace but not other way sir asked YOLO one of the friend gave reply...and then explained band 1 and 3 frequency range channel band width how to place video and audio within vhf range in 7mhz.then IRD INTEGRATED RECIVER DECODER functioning the video, audio and data extract and then DA VIDEO AND AUDIO amplifiers switchers the selection of programmes then exciter the vital part of transmitter here modulations and corrections etc takes place then power amplifiers boost the signal then 3db coupler diplexer and harmonic filter dehydrators and finally coaxial cable routed to antenna where the isotropic dipole scatter signals to viewers but they need yagi antenna then only they will get free signals from doordarshan..As

generations doordarshan adopted analog to digital numerous advantages within stipulate band relayed for five programmes at a time even mobile access is also. Finally end of the day we all rush back towards our college bus to reach their destination it is wonderful fully enjoyed the movements at doordarshan especially at transmitter area took few photos as a memory for us. Thanks to VIJAYAKUMAR SIR took lot of interest showed lack of time other topics like GPS. We the faculty Mr. Ramesh and Ms.G.Divya as well as all CSE students thank HOD, college Management and Principal for giving this opportunity.
